— VIBRATING PROCESS —

THE ELECTROMAGNETIC POWDERING UNIT

CONTROLLED SPRINKLING

- Suitable for all industries
- Sprinkling of bulk or powders
- Continuous flow control
- Customized Design

FEATURES

WIDTH

50 mm to 2400 mm

CONSTRUCTION MATERIALS

Steel

Stainless Steel 304L

Stainless Steel 316L

AVAILABLE IN FOOD GRADE

- Continuous welding
- No retention zones
- Ra 0.8 µm for product contact areas

Storage Hopper

- ▶ Custom-Made
- ▶ Manual or Automatic Feeding

Design

- ▶ Steel or stainless steel construction according to your requirements.
- ▶ Easy in-line installation above a conveyor system.

Adjustable Layer

- ▶ Allows control of layer height of coating

Product Output

Various configurations available:

- ▶ Sprinkling across the width of your belt
- ▶ Sprinkling through several independent channels

Motorization

- ▶ Controlled by Electronics Manufacturer
- ▶ Flow adjustment continuously from 0 to 100%
